WHY THIS IS BEFORE PVB

PVB is a private commercial bank, statutory veterans institution, and official government depository with evidenced public-sector, military, pensioner, assistance, collection, payment, and digital activity.

The accepted Program asks whether one reusable governed operating Capability could support selected public-finance services while PVB preserves banking authority, custody, accounts, data, providers, settlement relationships, production decisions, and readiness.

RECOMMENDED DECISION

Authorize Management to:

1. validate the Program's institutional premise and material Unknowns;
2. determine whether one bounded public-assistance disbursement ceremony is current, authorized, strategically relevant, operationally familiar, and suitable for detailed design; and
3. return with evidence and the exact next decision requested.

WHY PUBLIC ASSISTANCE

PVB has disclosed a student-allowance pilot with Parañaque and a financial-assistance relationship with BARMM. These provide the strongest PVB-specific basis for examining public authority, participants, funds, conditions, execution, evidence, exceptions, and reconciliation within a bounded ceremony.

This is a discovery candidate—not a production selection.

WHAT MANAGEMENT MUST RETURN

- institutional sponsor, purpose, authority, resources, and risk appetite;
- active public counterpart and validated ceremony;
- funds, accounts, custody, participants, conditions, and evidence;
- current systems, providers, interfaces, sovereignty, and controls;
- reconciliation, exception, support, security, and audit model;
- preliminary economics and current financial or regulatory dependencies;
- readiness conditions and unresolved risks; and
- a separate recommendation for any later step.

WHAT THIS DECISION DOES NOT AUTHORIZE

No implementation. No procurement. No contract. No system access. No integration. No production. No public program. No settlement activity. No commercial commitment.

DECISION PRINCIPLE

The first decision authorizes institutional learning. Every later decision must be supported by evidence appropriate to the responsibility PVB is being asked to carry.
